

Explain in steps or a paragraph how you would solve the following problems.  
What steps would you use and why?

1.  $8x - 7 = 4x + 5$

---

---

---

---

---

---

---

---

---

---

2. Using the domain  $\{-3, -2, -1, 0, 1, 2, 3\}$ , find the solution set for the open sentence  $(2n + 1)/3 = 1$

---
